DETAILED ACTION

Summary

This office action is in response to the amendment filed 12/21/04. Claims 12-20 have been amended as requested.

In order to expedite prosecution, the examiner has examined the amended claims, even though the amendment is Non-Compliant because a complete listing of the claims is not included. Applicant should note that claim 28-39 were not canceled, but withdrawn. Therefore, in response to this office action, Applicant is advised to submit a complete listing of the claims, including the withdrawn claims with text included.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a treatment device, classified in class 602, subclass 41.
 - II. Claims 12-27, drawn to a treatment device comprising a dental appliance, classified in class 433, subclass 136.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP §

806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed specific features present in the subcombination are not present in the combination claim. The subcombination has separate utility such as wound packing material or use on other appliances such as for example a feeding tube.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the search required for Group I is not required for Group II. Therefore, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
